### **Social catastrophes of the first half of XX century in Ukraine and the world: historical context and demographic aftermath**

**International Conference, Kyiv (Ukraine), 18-20 October 2016**

This conference seeks to address one of the currently most important themes – demographic losses in Ukraine and worldwide in the first half of XX century. WWI, disintegration of empires, independence wars and creation of new nations marked the beginning of the social catastrophes of XX century. Totalitarian ideologies of the interwar period turned into national tragedies for many peoples of Europe and the world. The Holodomor, mass repressions in the USSR, as well as WW II, changed the ethnic structure of Ukraine and of all of Central-Eastern Europe. Instrumentalization of the history of WW II, manipulation of Holodomor losses and of repressions became one of the most important components of the information war. In the current political rhetoric historical arguments are used to justify neo-imperial policy, annexation of territories, murders and destructions, as well as to undermine international security. In this situation, experts should defend professional standards and give the qualified estimate of tragic historical events and their consequences.

**We welcome papers that address one or more of the following areas:**

#### ***World crisis and their social and demographic aftermath:***

- Desintegration of continental empires and national liberation revolutions: social and demographic factors of new world order
